Digital Breeding Form

Control Cría Digital · Android Only

■■ NEVER uninstall the app without first making a backup. If you uninstall without a backup, you will lose ALL your data.

■■ NEVER tap "Clear data" or "Clear cache" for the app in Android Settings. This is equivalent to uninstalling.

■■ This application is exclusively for Android devices.

0. Installation — Enable Unknown Sources

Why is this necessary?

ControlCria is distributed as an APK file directly, without going through the Google Play Store. Android blocks the installation of apps from outside its official store by default as a security measure.

To install ControlCria you need to temporarily enable the option to allow installations from unknown sources. This does not pose any additional risk as long as the APK was provided directly by the developer — never download APKs from unknown sources.

How to enable it (Android 8 or higher)

- Open **Settings** on your phone.
- Go to **Apps** (or **Manage applications**, depending on your device).
- Find the app you will use to install the APK: usually **WhatsApp**, **Gmail**, or your phone's **File Manager**.
- Enter that app and enable **Install unknown apps** (or **Allow from this source**).
- Open the **ControlCria.apk** file and follow the installation instructions.
- Once installed, you can disable that option again if you wish.

■ *On Android 7 or lower: go to Settings → Security → enable "Unknown sources" globally.*

Digital Breeding Form · User Guide

1. Activation Screen (first time)

Important notes about the licence

- Each licence can only be used on **ONE device**. If you change phones, contact support.
- Only **ONE free device transfer** is allowed. From the second transfer onwards, a new licence must be purchased.
- The app requires an Internet connection every time it is opened to verify the licence. Without a connection, it cannot be used.
- Do **not share** your licence code. If someone activates it on another device, your licence will stop working on yours.

How to activate the licence

When opening the app for the first time, you will be asked for a licence code in the format:

CRIA-AAAA-0000

1. Enter the 8 characters of the code without hyphens — the app adds them automatically as you type the 8 characters (in this example you would only type AAAA0000).
2. Tap **Activate**.
3. If the code is valid, you will go directly to the breeding form.
4. The licence is linked to your device.

■ *The app already includes the CRIA- prefix in the field. You only need to type the remaining 8 characters.*

Digital Breeding Form · User Guide

Messages you may see on the activation screen

Message	Meaning	What to do
■ "Valid licence. Loading application..."	The licence has been activated correctly.	Wait a few seconds, the form will open automatically.
■ "Licence active on this device"	The licence is already active and working on your phone.	No action needed. The app will enter the form automatically.
■ "Previous licence detected..."	You have reinstalled the app and your previous licence has been recovered.	Tap Activate. Your code is already filled in.
■ "This licence is already in use on another device"	The licence is linked to another phone.	Contact support to request a transfer (the first one is free).
■ "Invalid or unrecognised key"	The code entered does not exist or is incorrect.	Check it is exactly CRIA-XXXX-XXXX (with hyphens, no spaces).
■ "Licence deactivated" / "Licence blocked"	The licence has been deactivated or blocked by the administrator.	Contact support to find out the reason.
■ "Connection error"	Could not connect to the licence server.	Check you have an Internet connection and try again.

Navigation between pages

These 2 icons located at the top of each page of the app allow you to navigate to the previous or next page.

Digital Breeding Form · User Guide

2. Form Structure

The form is divided into the following sections, which appear from top to bottom when scrolling:

2.1. Header — YEAR / CAGE / CLUTCH

This is the most important section: it defines which record you are editing.

Field	How it works
Year	Drop-down — tap the arrow to open it. Select the breeding year. Defaults to the current year.
Cage No.	+ and – buttons — tap them to change the value. Starts at 1. Each cage represents a pair of birds.
Clutch No.	+ and – buttons — tap them to change the value. Starts at 1. Each clutch is one breeding attempt in that cage for that year.

Step by step:

5. Select the **Year** from the drop-down.
6. Adjust the **Cage No.** by tapping + or – until you reach your cage number.
7. Adjust the **Clutch No.** (usually 1 for the first clutch, 2 for the second, etc.).
8. The app automatically loads the saved data for that Year + Cage + Clutch combination. If there is no data, a new empty record is created.

■ *Each Year + Cage + Clutch combination is an independent record. You can have Cage 1 with 3 clutches, Cage 2 with 1 clutch, etc.*

Digital Breeding Form · User Guide

2.2. CLUTCH Section — Dates

Here you record the key dates of the entire breeding process:

Field	What to record
Clutch Start	Date on which the female lays the first egg.
Clutch End	Date of the last egg laid.
Incubation Start	Date when the dummy eggs are removed and real incubation begins.
Check Eggs	Date to check whether eggs are fertilised. Usually 5–7 days after incubation start.
Expected Hatch	Estimated hatching date (13–14 days after incubation start in canaries/goldfinches).
Hatching	Actual date on which the chicks hatch.
Ringed	Date on which the chicks are ringed (5–7 days old).
Separated	Date on which the chicks are separated from the parents.
Independent	Date on which the chicks are feeding themselves.

How to enter a date:

9. Tap on the date field.
10. The device calendar picker opens.
11. Choose day, month and year.
12. Tap OK. The date is saved automatically.

Digital Breeding Form · User Guide

2.3. CLUTCH Section — Egg Counters

Just below the dates you will find counters with + and – buttons:

Field	What to record
Eggs	Total number of eggs laid.
Trodden	Eggs that have been trodden/fertilised by the parents.
Clear	Infertile eggs (no embryo, detected by candling or back-lighting).
Broken	Accidentally broken eggs.
Hatched	Number of chicks that have successfully hatched.

Tap + to add 1 to the counter, – to subtract 1. The value is shown in fluorescent yellow. Saved automatically.

2.4. DEATHS Section — Chick days 1 to 10

For each chick (1 to 10), you can record:

Field	What to record
Chick N days	Number of days chick N lived before dying. Use + / –. If the chick did not die, leave at 0.
Chick N causes	Free-text field to note the cause of death (e.g. "did not crop-feed", "illness" …).

Step by step:

13. If a chick dies, find its number (Chick 1, Chick 2, etc.).
14. Adjust the **Chick days** with + / – to indicate how many days it lived.
15. Write the causes in the text field below.
16. If the chick survives, leave everything as is (0 and causes field empty).

Digital Breeding Form · User Guide

2.5. Ringed / Raised

Field	What to record
Ringed	Number of chicks you have ringed in this clutch.
Raised	Number of chicks that have survived to independence.

Use the + / – buttons to adjust the values.

2.6. BIRTH Section — Individual records (Chick 1 to 10)

This section is a list of 10 records, one per possible chick. For each chick you can record:

Field	What to record
Ring No.	The number engraved on the closed ring you have fitted.
Colour/Variety	Description of the colour or mutation (e.g. "Ancestral", "Agate red", "Hybrid").
Sex	Select Male or Female by tapping the corresponding radio button.
Status	Mark Gifted or Loaned as appropriate. If the chick stays in your aviary, leave blank.
Notes	Free text for any annotation about this particular chick.

Step by step:

17. Scroll to the BIRTH section.
18. You will see the records labelled Chick 1, Chick 2, etc.
19. Fill in only the records for chicks that have been born. The rest can be left empty.
20. Enter the **Ring No.** in the text field.
21. Enter the **Colour/Variety**.
22. Select the **Sex** by tapping Male or Female.
23. If the chick has been gifted or loaned, mark the corresponding option in Status.
24. Add **Notes** if you wish.

Digital Breeding Form · User Guide

2.7. BREEDING PROCESS RESULT Section — Scores

Here you evaluate the parents' behaviour during the process. Divided into 4 categories:

Category	Description
Nest	Did they build the nest properly?
Incubation	Did they incubate correctly?
Crop-feeding	Did they feed the chicks properly?
Egg breaking	Did they break eggs?

For each category there are two scores:

Field	What to record
Father score	Father's score (0 = not evaluated, higher = better performance).
Mother score	Mother's score (0 = not evaluated, higher = better performance).

Use the purple + / – buttons to increase or decrease the score.

■ *At the end of this section there is an OBSERVATIONS (POOR RESULT) field to note general issues with the clutch.*

2.8. CAGE HEIGHT

Select the position/height of the cage in your aviary by tapping the corresponding radio button: 1, 2, 3, 4, 5 or 6.

1 = lowest, 6 = highest. The selected circle appears filled.

2.9. NEST POSITION

Indicate where the nest is placed inside the cage: Left or Right.

2.10. LIGHT HOURS

Record the hours of artificial light the cage receives using + / –. Increases in steps of 0.5 hours. Displayed with one decimal (e.g. 14.0 / 14.5 / 15.0).

Digital Breeding Form · User Guide

2.11. USE OF FOSTER HENS

If you use foster hens:

25. Tick the **Use foster hens** button.
26. A date picker will appear — enter the date of transfer to the foster hen.

2.12. FOSTER HENS Section — Individual records (Foster 1 to 10)

For each foster hen you can record:

Field	What to record
Ring No.	Ring of the foster hen.
Cage No.	Cage where the foster hen is located.
Nest Position	Left or Right.
Cage Height	Height position of the cage (1 to 6).
Notes	Free text about the foster hen.

Each foster hen also has the same 4 scoring categories as the parents: Nest, Incubation, Crop-feeding and Egg breaking (father / mother score).

3. Auto-save

All data is saved automatically every time you modify any field. There is no "Save" button.

Action	Result
You change a number	Saved automatically.
You enter text	Saved automatically.
You select a date	Saved automatically.
You change cage/clutch/year	The previous record is saved and the new one is loaded.

Digital Breeding Form · User Guide

4. Navigation Between Records

To view or edit another record:

27. Change the Year, Cage or Clutch in the header.
28. The app saves the current record automatically.
29. It loads the data for the new combination (or creates an empty record if it does not exist).

You can navigate freely between records without losing data.

5. Backup Management

Tap the goldfinch icon in the top-right corner of the form to access the Backup and Data Management screen.

■■ If you uninstall the app without a backup, you will lose ALL your data. Always make a backup before uninstalling or changing device.

Digital Breeding Form · User Guide

5.1. STEP 1 — Save a copy of your data

■ **Save a copy of my data**

Tap this button to create an encrypted copy of all your data. The copy is saved simultaneously in two places:

- **Local:** Downloads/ControlCria folder on your device.
- **Cloud:** Cloud backup linked to your licence (requires Internet connection). If there is no connection, it is saved locally only.

■ *The encryption key is built into the app. You do not need to export or store it separately. The app automatically keeps the 4 most recent local copies.*

5.2. STEP 2 — Restore a copy

■ **Restore a copy of my data**

Use this when you reinstall the app, change device, or want to go back to a previous copy. The app follows this order automatically:

- **Searches the cloud:** if there is a copy saved in the cloud for your licence, it asks whether you want to restore it. This is the most convenient option because it works on any device without needing files.
- **If there is no cloud copy or you decline:** it automatically searches the Downloads/ControlCria folder on the device. If there are several copies, it shows the 4 most recent ones for you to choose from.

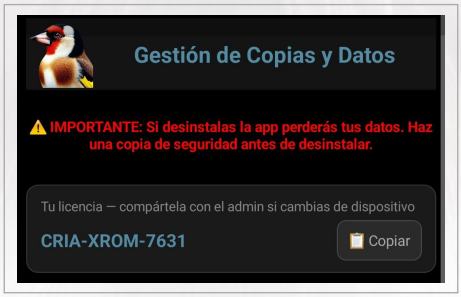
■ *You do not need to navigate to any folder or manage any files. The app does it automatically.*

5.3. Device change

Thanks to the cloud backup, changing device is very straightforward. You do not need to send any file via WhatsApp or remember any key.

- **On the source device:** tap "Save a copy of my data" to make sure the cloud has the latest version.
- Contact support for the licence transfer to the new device (first transfer is free).
- **On the target device:** install the app, activate the transferred licence and tap "Restore a copy of my data". The app will automatically find the cloud copy and restore all your data.

■ *If the new device has no Internet connection when restoring, you can manually copy the file from the Downloads/ControlCria folder of the old phone to the new one via a cable or any file-transfer app, then tap "Restore a copy of my data".*



You must share your licence with the administrator to recover your database.

Digital Breeding Form · User Guide

6. Important Reminders

■	NEVER uninstall the app without a backup. Without one, you will lose all data. With a saved copy (local or cloud), you can recover everything after reinstalling.
■	NEVER tap "Clear data" or "Clear cache" for the app in Android Settings. This is the same as uninstalling.
■	The app needs Internet to work. Every time you open it, it verifies your licence with the server. Without a connection (Wi-Fi or mobile data), you cannot access the form.
■	Do not share your licence code. If someone enters it on another phone, your licence will stop working on yours.
■	Make a backup at the end of the breeding season. The app will remind you if you have gone more than 2 months without a backup.
■	If the app asks for a licence after an update, do not worry. Simply tap Activate with your code, which should already be filled in. You have not lost your data.
■	If you change phone, contact support to transfer the licence. Then restore your data automatically from the cloud. See section 5.3 of this guide.
■ ■	To update, install the new APK on top without uninstalling. All your data is preserved.
■	You do not need to tap "Save". Everything is saved automatically every time you modify a field.
■	You can navigate between cages, clutches and years without losing data. The app saves before switching records.
■	Android only. Not available for iPhone/iOS.
■	If the app closes unexpectedly, open it again. Your data is stored in the internal database.
■	If you see a black screen on opening, wait a few seconds. The app is verifying the licence and initialising the database.
■	If you need to perform a factory reset, make a backup BEFOREHAND. After a factory reset, the phone is treated as a new device and you will need to transfer the licence.

Digital Breeding Form · User Guide

7. Frequently Asked Questions

Question	Answer
Will my data be lost if I update the app?	No. Install the APK on top and everything is preserved.
Will it be lost if I uninstall?	Only if you have no saved copy. If you made a backup, the app recovers it automatically from the cloud or Downloads when you reinstall.
Can I use the app on two phones at once?	No. Each licence works on one device only.
Can I use the app without Internet?	No. It needs to verify the licence every time it is opened.
Does it work on iPhone?	No. Android only.
Does it work on an Android tablet?	Yes, as long as it has an Internet connection.
I have changed phone, what do I do?	Contact support to transfer the licence. Install the app on the new device, activate the licence and tap "Restore a copy of my data". The app will recover your data automatically from the cloud.
"Licence in use on another device"	Contact support. You probably changed phone or performed a factory reset.
"Invalid key"	Check the code letter by letter. It must be CRIA- followed by 4 characters, hyphen, 4 characters.
The app stays on a black screen for a long time	Check your Internet connection. The app needs to connect to the licence server.
Can a chick's Status be marked as "Dead"?	No. Chick deaths are recorded in the DEATHS section (days lived + cause). In the birth record you can only mark Gifted or Loaned.

Digital Breeding Form · User Guide

7. Privacy Policy and Terms of Use

The full Privacy Policy and Terms of Use are available at:

https://sites.google.com/view/appcriadigital/inicio

1. Data controller

Sant Jordi Asociación Silvestrista Alcoy — assalcoi@hotmail.com

2. Who stores your data

Data is stored on Google LLC services (Google Forms, Google Sheets, Google Drive), acting as data processor under Art. 28 GDPR. For physical shipments, necessary data is shared with the contracted courier company.

3. What data is collected

Order form: name, shipping address, postcode, city, province, country, phone and email. Retained for order history and incident management.

Application: contact phone number, licence code, anonymised technical device identifier, and activation data. Breeding data is stored only on your device. Cloud backups are sent encrypted.

4. How your data is used

- To manage and process your order and coordinate shipping.
- To verify and link your licence to the authorised device.
- To allow backup recovery and manage licence transfers.

5. Legal basis (GDPR)

- **Contract performance (Art. 6.1.b GDPR):** order and licence management.
- **Legitimate interest (Art. 6.1.f GDPR):** order history and fraud prevention.
- **Consent (Art. 6.1.a GDPR):** non-essential communications and cloud backup.

6. Your rights

You have the right to access, rectify, erase, restrict, port and object to the processing of your data, as well as to withdraw consent at any time. Contact us at **assalcoi@hotmail.com**. You may also lodge a complaint with the AEPD at www.aepd.es (Tel. 901 100 099).

7. Security

We apply appropriate technical and organisational measures to protect your data against unauthorised access, loss or alteration, both on the device and during transmission and cloud storage.

Digital Breeding Form · User Guide

8. Acceptance

By submitting the order form or by downloading and using the application, you confirm that you have read and accepted this Privacy Policy and Terms of Use.

■■ Order form — mandatory checkbox

The order form includes a **mandatory checkbox** that the user must tick before submitting their order:

■ ***I have read and accept the Privacy Policy and Terms of Use***

The link to the privacy policy is visible in the form. Without ticking this checkbox the order cannot be submitted. The application and the licence key are only sent via WhatsApp once acceptance is confirmed.

8. Application and Licence Distribution

■■ IMPORTANT

Once the Privacy Policy has been accepted and the order processed, each user will receive via **WhatsApp**:

- **The installation file (APK)** of the ControlCria application.
- **Their personal licence key** in the format **CRIA-XXXX-XXXX**, required to activate the application.
- **Keep your key in a safe place and do not share it with anyone. Each licence is personal and non-transferable and only works on one device at a time. If someone activates your key on another phone, it will stop working on yours.**

To install the app, follow these steps once you have received the files via WhatsApp:

- Enable installation from unknown sources on your phone (see section 0 of this guide).
- Open the APK file received via WhatsApp and follow the installation instructions.
- Open the app and enter your **CRIA-XXXX-XXXX** key on the activation screen (see section 1 of this guide).

 Digital Breeding Form · User Guide

9. Language Selection Screen

The Language Selection screen allows you to change the display language of the entire application at any time. It can be accessed from the main navigation using the goldfinch icons at the top of any page.

Available Languages

Language	Code
English	en
Italian	it
French	fr
Dutch	nl
Portuguese	pt
Croatian	hr
Maltese	mt

How the Language Selection Screen Works

The screen displays one card per available language. Each card shows the country flag, the language name in its native form, and a visual indicator of the currently selected language.

Visual indicators:

- **White border** · the language currently selected and active in the app.
- **Black border** · languages not currently selected.
- **Tick icon (·)** · visible only on the active language card.

Step by Step · Changing the Language

1. Navigate to the Language Selection screen using the goldfinch icons at the top of any page.
2. The currently active language is highlighted with a white border and a tick.
3. Tap the card of the language you wish to use.
4. The border of the tapped card turns white and the tick moves to that card immediately.
5. The language change takes effect immediately across the whole app.

· The language change takes effect immediately. All translatable texts · screen titles, button labels and field names · update as soon as a language is selected.

Technical Behaviour

Behaviour	Detail
Persistence	The selected language is saved and restored every time the app is opened.
Page title	The screen title updates dynamically to match the active language.
Navigation	The goldfinch icons jump directly to Data Management (left) or Breeding Form (right).
No restart needed	The language change takes effect immediately without restarting the app.

· You do not need to restart the application after changing the language.
